

Product Information

AQUABLEACH

Aquableach is a sodium hypochlorite based bleaching compound with many uses as a sanitiser and bleaching agent. Aquableach is ideal for whitening and removing stains from linen etc. and for the treatment of drains, toilet bowls, sinks etc.

Aquableach is also useful for removing algae and lichen from roofs, walls and concrete floors.

◆ DIRECTIONS:

Laundry Presoaking: Add 50mls Aquableach to approximately 7 litres water. Soak items for 1-2 hours. Rinse thoroughly in clean water.

Stain removal: For white and colorfast fabrics (excluding wool and silk). Soak in warm water for 20 minutes then in a solution of 50mls Aquableach per 2-3 litres of warm water.

General cleaning of basins, baths, tiles, floors etc. 50mls Aquableach per litre of water is recommended.

For toilet bowls and drains use 100mls of undiluted Aquableach.

◆ PRESENTATION:

Aquableach is available in 2 litre, 5 litre and 20 litre containers.

◆ NZFSA:

Aquableach is NZFSA Approved C41 (All animal product except dairy)

◆ HAZARDS:

Corrosive and oxidizing material. (Contains 40 grams of sodium hypochlorite per litre). Do not mix with other chemicals or cleaners. Avoid contact with skin or eyes. Wear protective clothing, gloves and goggles. Harmful if swallowed.

Keep out of reach of children. Container has a vented cap, so store and transport in an upright position. Store securely capped in a cool place. Destroy or dispose of empty container safely.

◆ FIRST AID:

If swallowed: do not induce vomiting. Give water or milk to drink. Seek medical attention.

In case of skin or eye contact: flush with water for 10-15 minutes. Seek medical attention.

A Safety Data Sheet is available for this product on request.
