

Product Information

FORMULA T36 – Vehicle Machinery Cleaner

Formula T36 is an alkaline blend of liquid detergent formulated to remove road film, oil and dirt from motor vehicle bodies, truck & trailer canopies and machinery, either by water blasting or brushing.

◆ DIRECTIONS:

Mix Formula T36 in a water solution at about 10 to 30 mls per litre. Apply with a brush or broom and hose off to rinse.

Alternatively add solution to water blaster tank. Apply under pressure then hose off thoroughly with clean water until all Formula T36 is removed.

Note: Due to concentrated formula of Formula T36, streaking may occur if stronger solution than necessary is used and/or product is allowed to dry out on surface before being washed off with water. For this reason we recommend that the above dosage rate is not exceeded.

◆ BIODEGRADABLE:

The surfactants in this product are biodegradable according to internationally accepted criteria.

◆ PRESENTATION:

Presentation:

Formula T36 is available in the following pack sizes:

- 5 litre containers
- 20 litre Jerry Cans
- 200 litre drums

◆ NZFSA APPROVAL:

Formula T36 is NZFSA Approved C37 (All animal product except dairy)

◆ HAZARDS:

Harmful if swallowed. Keep out of reach of children. Avoid contact with skin or eyes.

◆ FIRST AID:

If swallowed: do not induce vomiting. Rinse mouth with water and give water or milk to drink. Seek medical assistance. For eye or skin contact: flush with water. If irritation develops seek medical attention.

A Safety Data Sheet is available for this product on request.
