

Product Information

KLEENCRETE CONCRETE CLEANER

Kleencrete is a concentrated, alkaline powder cleaner, formulated to remove oil and grease from asphalt and concrete driveways, workshop floors, service station forecourts and other similar areas. Kleencrete is also effective as a general cleaner for concrete steps and working floors.

◆ DIRECTIONS:

Wet the area to be cleaned and sprinkle the powder liberally over the surface. Work in well with a hard broom and leave for 5-10 mins. Ensure that the treated area remains damp and does not dry out. Rinse off by hosing with water. Badly stained areas may require a longer soaking time and / or a repeat cleaning.

For smaller areas such as steps, dissolve Kleencrete in hot water and then pour liberally over the surface. Work in well with a scrubbing brush and leave to soak before hosing away.

◆ BIODEGRADABLE:

The surfactants in this product are biodegradable according to internationally accepted criteria.

◆ PRESENTATION:

Kleencrete is available in 900gm, 4kg, 20kg and 50kg pack sizes.

◆ NZFSA APPROVAL:

Kleencrete is NZFSA Approved C37 (All animal product except dairy)

◆ HAZARDS:

Kleencrete contains 750gm Sodium Metasilicate per kg. Corrosive to eyes. Repeated or prolonged contact may lead to skin irritation. Avoid inhaling product. Kleencrete, like all chemical products, should be kept out of reach of children at all times.

◆ FIRST AID:

For advice, contact National Poisons Information Centre Phone 0800 764 766.

For eye contact: rinse cautiously with water for several minutes. Remove contact lenses if present. Immediately call a doctor.

For skin contact: wash with plenty of soap and water. If skin irritation occurs get medical advice/attention.

A Safety Data Sheet is available for this product on request.
