CLEANLINESS ASSURED – DAIRY FARM HYGIENE RANGE

CLARKS HAS LEAD THE WAY IN INNOVATIVE AND AFFORDABLE PRODUCTS DESIGNED TO KEEP BUSINESSES PERFORMING AT THEIR VERY BEST

Proudly New Zealand owned since the 1960's, Clarks continues to provide top quality products and services to customers Nationwide.

We offer a full range of quality cleaning products designed to clean any size commercial food and beverage manufacturing facility and our friendly and knowledgeable team are here to assist.

CLARKS is committed to sourcing, manufacturing and supplying a full range of products to meet the quality and usage requirements of our clients. We manufacture our products locally in Napier, Rotorua and Auckland and strive for the highest standards of compliance and safety in the country.

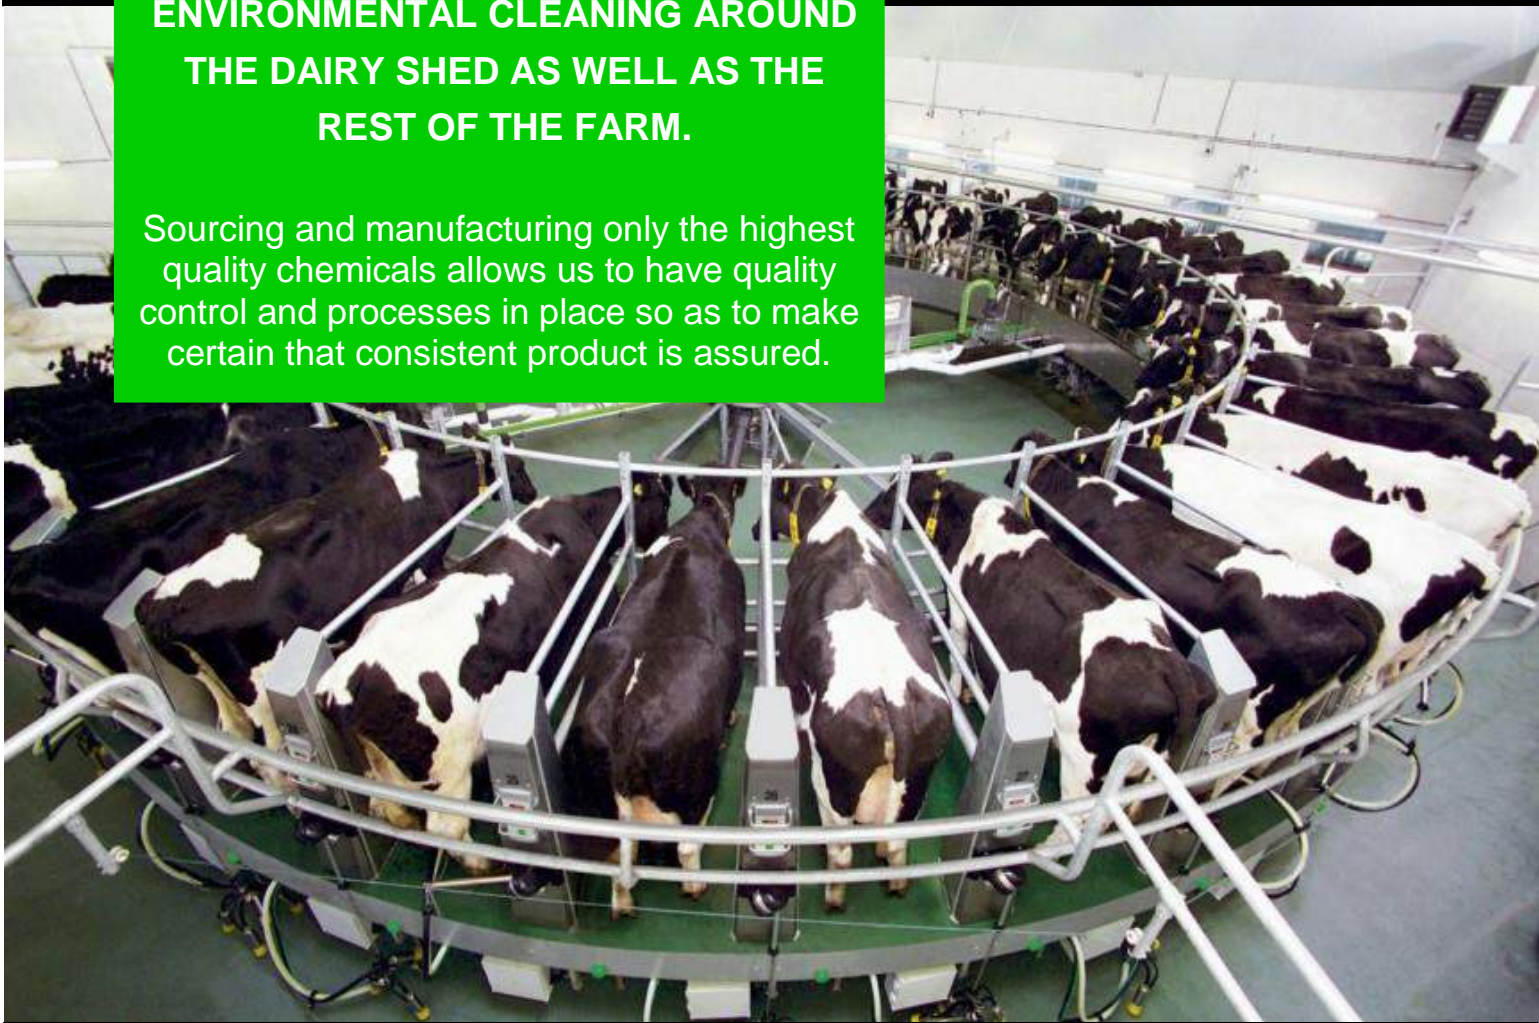

We look forward to helping you.

CLARK PRODUCTS DAIRY FARM HYGIENE RANGE

CLARKS OFFERS A RANGE OF NZFSA APPROVED CLEANING PRODUCTS SPECIFICALLY FOR INTERNAL AND ENVIRONMENTAL CLEANING AROUND THE DAIRY SHED AS WELL AS THE REST OF THE FARM.

Sourcing and manufacturing only the highest quality chemicals allows us to have quality control and processes in place so as to make certain that consistent product is assured.

Modern farming in NZ demands the highest level of cleanliness of milking machinery and equipment. Failure to meet exacting standards impacts directly on farm profitability; farmers need reliable products that offer certainty. CLARK PRODUCTS LTD have developed a range of cleaning chemicals incorporating the latest “triple action” surfactant technology, which has been trialled in a variety of milking plants with varying water quality. Results of the trials have been nothing short of superlative in all plants and the demanding new “rinsability” tests have all been achieved.

ALKALIS

CLARK ULTIMATE POWDER CAUSTIC

A high strength low foaming chlorinated alkaline detergent sanitiser with advanced surfactant technology, ensuring superior cleaning of all milk contact surfaces in the farm and dairy industries. The “all in one” formulation is designed to remove fat and protein deposits from the milking plant and BMT.

NZFSA Dairy Maintenance Compound Approved

Availability:

CLARK ULTIMATE LIQUID CAUSTIC

Utilising the same technology as the ULTIMATE POWDER CAUSTIC, ULTIMATE LIQUID CAUSTIC is an alkaline detergent sanitiser with advanced surfactant technology, ensuring superior cleaning of all milk contact surfaces in the farm dairy. It is designed to remove fat and protein deposits from the milking plant and BMT. Designed to be utilised with auto dosing equipment alongside ULC.

NZFSA Dairy Maintenance Compound Approved

Availability:

CLARK PRODUCTS DAIRY FARM HYGIENE RANGE

ACID

CLARK ULTIMATE ULF ACID

A powerful blend of Phosphoric and Sulphuric acids with advanced surfactant technology ensuring superior cleaning of all milk contact surfaces in the dairy industry. The formulation is suitable for all temperature use and water types, with an optimum foam profile for all modern milking machinery.

NZFSA Dairy Maintenance Compound Approved

Availability:

Reference:

Trevor Gulliver, Consultant, Advanced Dairy Solutions

"During my career of more than 20 years supplying dairy hygiene chemicals into the dairy industry, I've never seen results like those that we experienced during the trials of the CLARK ULTIMATE RANGE of products.

The purpose of the trial was to establish the suitability of these new products when used to clean and sanitise milk contact surfaces in the farm dairy, including the milk silo.

It was important to CLARKS they manufacture a range of products that would perform in all water types and milking plant design, have a very low foam profile and outstanding cleaning ability. All of the above qualities were not only met, they were exceeded.

The build of these products is quite unique with the triple action surfactant formulation ensuring superior cleaning of all milk contact surfaces, whilst reducing the risk of detectable detergent residues in fresh milk."

"CLARKS are on to a winner with this range!"

SANITISERS

CLARK ULTIMATE LIQUID CHLORINE

Sodium Hypochlorite manufactured using the well-known chlor-alkali process from concentrated brine solution. The product contains greater than 12% Free Available Chlorine when packed. For use in combination with the CLARK ULTIMATE LIQUID CAUSTIC and also finds many other uses around the farm, including water treatment.

NZFSA Dairy Maintenance Compound Approved

Availability:

CLARK GEOSIL 150

No odour. Effective sanitiser and water treatment. A unique sanitiser combining the benefits of 7.5% Hydrogen Peroxide and trace levels of Colloidal Silver Stabiliser. Geosil 150 is **ORGANICS CERTIFIED**, doesn't trigger DG concerns for storage or transportation and is effective across a broad range of contaminants. Suitable for no rinse sanitising when diluted 100:1.

NZFSA Approved C41, C43, C61 and Assurequality Organics Certified

Availability:

Farmer feedback – Tony Baker Puketiro Farms :

"We were asked by Clark Products to do a trial on their Ultimate ULF Acid and Ultimate Alkaline Powder. During the 10-week trial period we found the low dose rate for the acid was economical, it was easy to use and we were amazed at just how quickly the foam broke down. The alkaline powder was used twice weekly with excellent results, with absolutely no protein build up in either the milking plant or vat. When the plant was being washed, you could see the foam covering the whole receiving can and our cluster bowls, which is the first time I have seen that in our plant. We have been milking for the past 20 odd years and have used different company's products through different sheds that we have worked in. This is the only product I have used that bought an amazing shine to the stainless pipe work in less than two weeks. After the trial, we went back to our other detergents and the shine started to disappear within a week. I would recommend these products to any dairy farmer that has different staff cleaning their plant, likes to have a clean plant and not need to scrub it once a week or month"

CLARK PRODUCTS CLEANING CHEMICAL RANGE

Clarks manufacture a proven range of commercial and domestic cleaning chemicals.

Made in our ISO9001 Accredited manufacturing plant, Clark's cleaning chemicals are known for being commercial strength products sold at factory direct pricing. Our friendly and knowledgeable team will be able to assist with any cleaning problem and orders.

Automotive Cleaners & Industrial Cleaners	HD Degreaser, Building & Vehicle Wash, Rust Killer, Concrete Cleaner
Bathroom & Toilet Cleaners	Shower Glass Cleaner, Borax Scourer, Reodourant, Perfumed Cubes, Bowl Cleaner, Portaloo Chems
Kitchen Dishwash & Dishwasher Chemicals	Lemon Dishwash, Dishwasher Powder, Rinse Aid, Commercial Machine wash, Spray & Wipe
Disinfectants	Eucalyptus, Pine, Spring & Clinitol Disinfectants
Handcleaners, Home & Industrial	Bathroom Handwash, HD Handcleaner, Barrier Cream
Indoor Cleaners	Degreaser, Sugar Soap, Spray & Wipe Clean & Disinfect, Citrus Cleaner
Aerosol Range	Flyspray, Oven Cleaner, Multi Cleaner, Air Freshener, Stainless Steel Cleaner
Laundry	Laundry Powder, Laundry Liquid, Fabric Softener, Washing Soda Crystals
Outdoor & Glass Cleaners	Window Cleaner, HD Degreaser, SUB30 Moss & Lichen Killer
Sanitisers & Tank Water Treatment	Hyposal Thickened Bleach, Bleach, GEOSIL, Chlorinated Foam Cleaner
