

ULV Foggers

In recent times, there's been a growing emphasis on keeping our surroundings clean and safe. Whether it's at work, school, hospitals, or even our houses, we all aim to maintain an environment free from harmful bacteria and viruses. A technique gaining notable recognition in this regard is disinfecting fogging.

Benefits of using ULV

- More Power
- Controlled droplet size
- Chemical resistant components
- Certified by the Department of Defence in the USA
- Made tough, with reinforced polymers
- 45 minutes fogging time

DC20+

DC20+ Has 45 minutes of continuous fogging time with just 2.5 hours of charge time to fill the battery.

C150+

The most powerful ULV fogger with huge solution tank. Designed to endure extreme conditions with cutting edge air intake technology.
