**CLARKS LEADS THE WAY IN INNOVATIVE AND
AFFORDABLE PRODUCTS DESIGNED TO KEEP
BUSINESSES PERFORMING AT THEIR VERY BEST.**

Clark Products continues to provide top quality products and services to customers Nationwide.

We offer a full range of quality cleaning products designed to clean any size commercial food and beverage manufacturing facility and our friendly and knowledgeable team are here to assist.

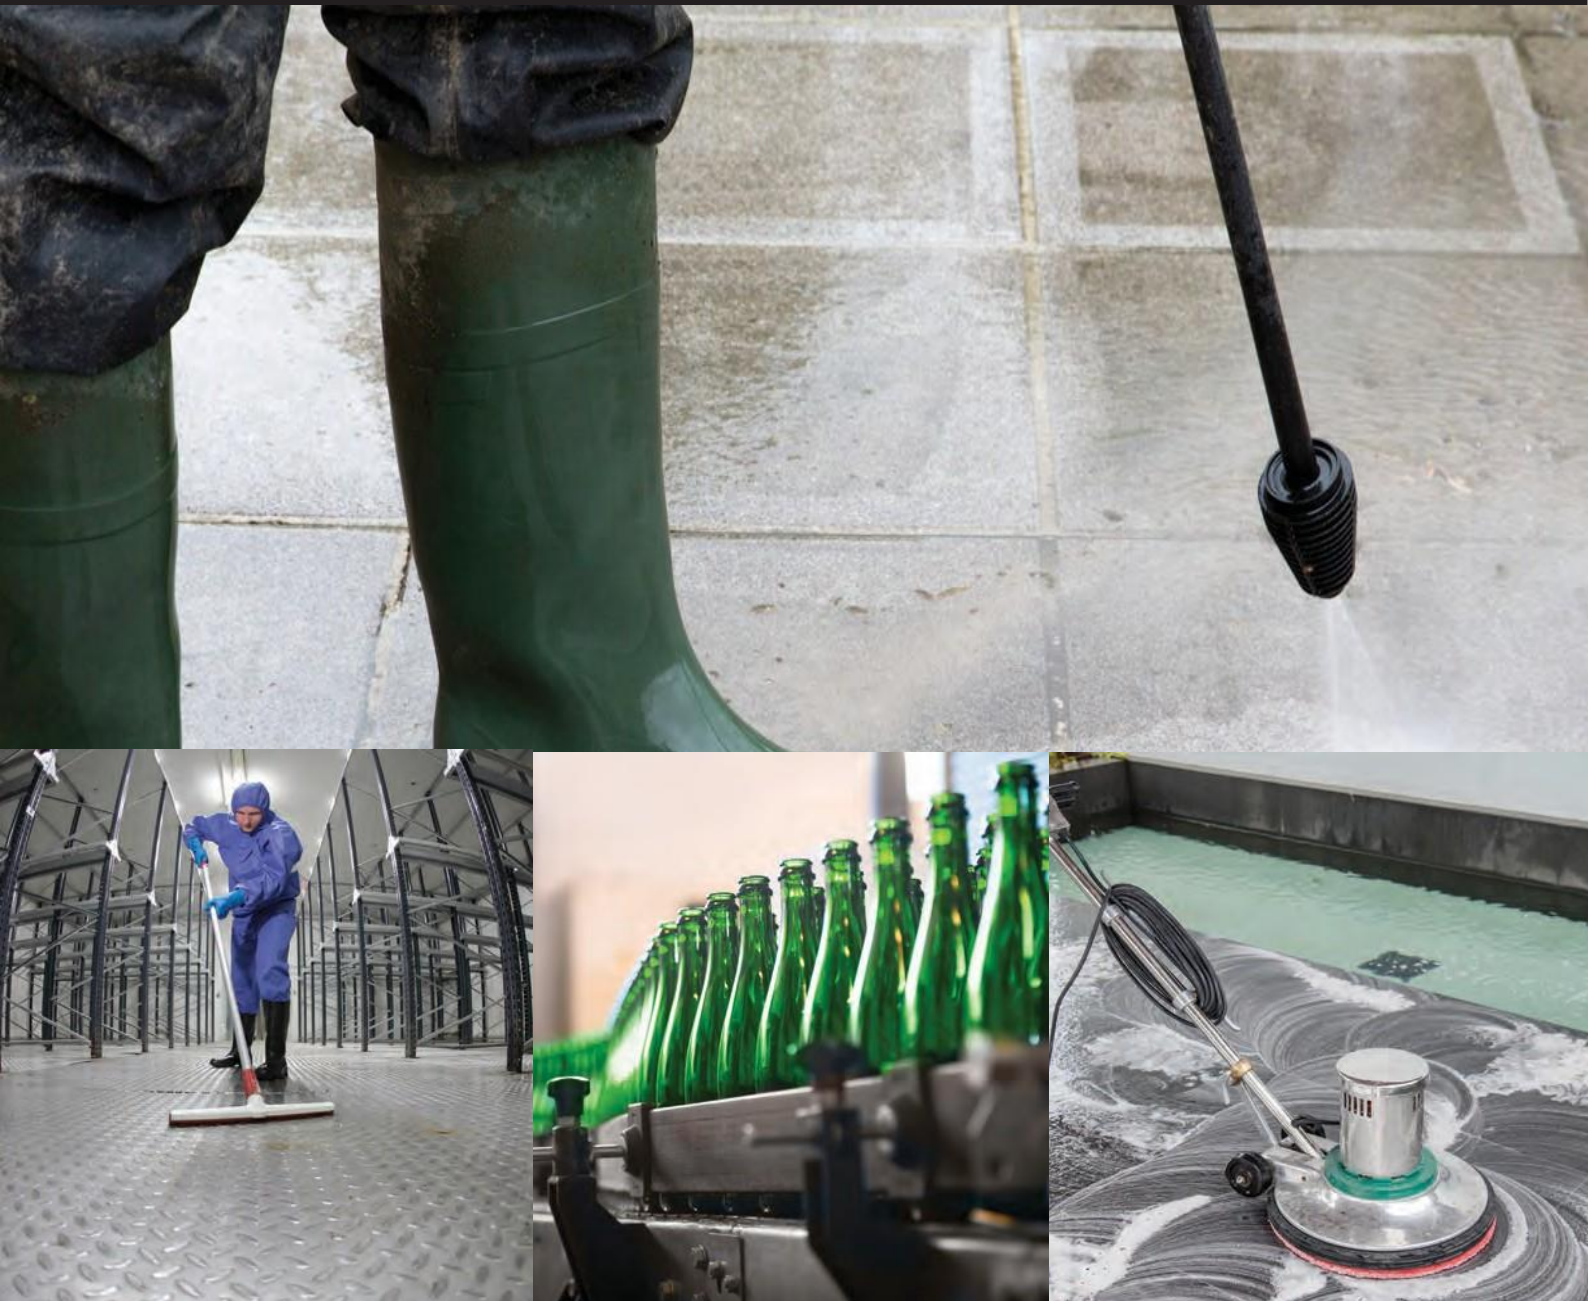

CLARKS is committed to sourcing, manufacturing and supplying a full range of products to meet the quality and usage requirements of our clients. We manufacture our products locally in Napier, Rotorua and Auckland and strive for the highest standards of compliance and safety in the country.

We look forward to helping you.

**CLARKS OFFERS A LARGE RANGE OF
CLEANING PRODUCTS SPECIFICALLY
FOR FOOD AND BEVERAGE
MANUFACTURING.**

Sourcing and manufacturing only the highest quality chemicals allows us to have quality control and processes in place so as to make sure a consistent product is assured.

ALKALIS

CIP 30W ALKALI CLEANER

A sophisticated boosted CIP Alkali cleaning solution.

A complex alkali blend containing 400gms/lit Sodium Hydroxide, surfactants and chelating agents designed to quickly and effectively remove organic soiling from food processing machinery and equipment. Especially formulated to prevent freezing down to 0°C and to provide reliable low foaming cleaning.

MPI Approved C31

Availability

CIP-8 ALKALI CLEANER

A highly concentrated CIP Alkali Cleaning Solution.

An alkali blend containing 600gms/lit Sodium Hydroxide, surfactants, chelating agents and sequestering additive to effectively remove organic soils and hold them in suspension.

MPI Approved C31

Availability

CIP 6 LINE & TANK CLEANER

High Strength caustic CIP solution.

The proven workhorse of the Clarks CIP Alkali range containing 330gms/lit Sodium Hydroxide boosted with chelating agents to remove stubborn protein and organic soils from food processing equipment.

MPI Approved C31

Availability

PROCESS CS

Alkaline powder cleaner & sanitiser.

An especially formulated alkaline powder cleaner and sanitiser primarily designed for pipelines and associated equipment in food manufacturing & brewing and wine industries. It is non caustic and contains active oxygen ingredients to safely and effectively remove protein soils.

MPI Approved C31

Availability

ACIDS

CRETEAWAY H/S

Phosphoric based mineral and scale remover.

An acid blend containing 280gms/lit Phosphoric Acid, surfactants and sanitiser. Specially formulated to remove mineral scale and to clean, shine and sanitise stainless steel surfaces. Controlled foaming when used at higher CIP temperatures and medium foaming below 40 °C..

MPI Approved C31

Availability

TANKBRITE LF

Phosphoric and Nitric low foam heavy duty scale remover.

A balanced blend of Phosphoric and Nitric Acid with total acid content of 300gms/lit designed to quickly remove mineral scale from food and processing equipment. This acid blend will passivate and shine stainless steel. Particularly effective at removing beer stone scale in brewing equipment. Very low foam at all temperatures.

MPI Approved C31
MPI Dairy Recognised

Availability

GEOSIL 150

Organics approved no odour sanitiser.

A unique sanitiser combining the benefits of 7.5% Hydrogen Peroxide and trace levels of Colloidal Silver stabiliser. Geosil 150 doesn't trigger DG concerns for storage or transportation and is effective across a broad range of contaminants. Suitable for no rinse sanitising when diluted 100:1.

Geosil Concentrate is MPI Approved C41, C61 and MPI Dairy Approved

Availability

GEOSIL CONCENTRATE

Highly concentrated peroxide solution stabilised with colloidal silver.

Concentrated version of Geosil 150 containing 50% Peroxide. Utilised for a wide range of sanitising purposes including water treatment, food & beverage preparation equipment and for post harvest fruit and vegetable washing to improve shelf life.

Geosil Concentrate is MPI Approved C41, C61 and MPI Dairy Approved

Availability

SODIUM HYPOCHLORITE

Liquid chlorine sanitiser and bleach.

Traditional liquid chlorine cleaner sanitiser containing greater than 12% FAC when packed

MPI Approved C43
MPI Dairy Approved

Availability

EVONIK PERFORM

Peracetic Acid Sanitiser.

Water clear, colourless liquid comprising an equilibrium mixture of 25% hydrogen peroxide, 4% peroxyacetic acid, water and acetic acid. Utilised in a variety of sanitising applications including use as a no-rinse sanitiser for stainless steel surfaces when used at 0.1% actives..

MPI Approved C41, C42, C43, C101 -88

Availability

SANIPHOS ACIDIC CLEANER SANITISER

An acidic sanitiser especially formulated for food & beverage surface cleaning and sanitising. It is a blend of Phosphoric Acid and specially selected surfactants which provide controlled foaming, cleaning and sanitising of equipment used in food & beverage manufacture

MPI Approved C31

Availability

FOAMING ACID CLEANER

An acidic foaming cleaning chemical especially designed for application via compressed air foaming equipment for COP operations to remove mineral scale and to shine stainless surfaces.

Availability

Q-JET CT10

Automatic 3D Room Disinfection

The Sanosil Q-Jet C-10 is a compact and handy device, which is especially suitable for aerosol disinfection of small and medium – sized rooms up to approx. 100m³.

In comparison with similar competitor products, the C10 impresses with its quiet operation and robust, high quality workmanship that ensures high availability.

Thanks to the switchable flow rate, the device can be used not only for rooms up to max 100m³ (at a dosage of 8m liquid/m³), but also in confined spaces.

Its compact dimensions make trans-orting / relocating the device easy.

The Sanosil Q-Jet is powered by a compressor and a high-quality fine mist nozzle which produces droplet sizes between 5 and 15 microns. This enables particularly good wetting of all surfaces and is superior to most devices that use turbines as the sole method of mist generation. Thanks to its compressor, the device is also very quiet, with a sound pressure level of only 50 -60 dB, which is equivalent to a normal conversation or moving car.

Q-JET CT20

Automatic 3D Room Disinfection Device

The Q-Jet CT20 represents the pinnacle of aerosol equipment development over the past 20 years. The heart is the proven compressor/ fine nozzle technology, which provides a fine dry disinfection mist. By adjusting the compressor power, a fog development is still possible even at wall distances of only 2m - an advantage that practically all other units in the same performance range cannot offer.

However, if the CT20 is needed for a larger room, a powerful turbine can be switched on. Its air jet acts like a turbofan and not only provides the disinfectant droplets with a significantly wider trajectory, but also ensures optimum distribution in the room. Thanks to the 5l active ingredient tank, a room of up to 600m³ can be fogged with a dosage of 8ml/m³.

The device is standard equipped with 2 different operating modes. In auto mode, the room is automatically flooded with disinfectant mist up to the saturation limit of the air. When the saturation is reached, the unit stops automatically and continues to operate only when the humidity has decreased again slightly. This prevents condensation and thus uneven distribution of the mist in the room. It also prevents material damage caused by liquid.

In expert mode, the desired amount of disinfectant can be manually distributed over up to 4 cycles of definable length, as well as 3 individual intermediate pauses.

The device is operated via a touch screen and also has a logging function. This allows each disinfection process to be saved for quality purposes

The Sanosil Q-Jet is powered by a compressor and a high quality fine mist nozzle which produces droplet sizes between 5 and 15 microns. This enables particularly good wetting of all surfaces and is superior to most devices that use turbines as the sole method of mist generation. Thanks to its compressor, the device is also very quiet, with a sound pressure level of only 50 -60 dB, which is equivalent to a normal conversation or moving car.

CLEANER SANITISERS

FOAMPLUS MK2

Chlorinated Alkali foam cleaner sanitiser

A high foaming chlorinated alkali cleaner sanitiser designed for use with specialist foaming equipment. Foam clings to vertical surfaces to improve dwell time providing physical cleaning action to effectively remove protein soils and sanitise surfaces.

MPI Approved C31

Availability

ACISAN

Acid Sanitiser.

A premium blend of phosphoric acid, hydrogen peroxide and acetic acid specifically designed for acid phase CIP. ACISAN is low foam and is very effective at removing complex soils and scale deposits from food and dairy processing equipment. ACISAN also passivates and shines stainless steel through the cleaning process.

MPI Approved C31

Availability

ALKAQUAT HD

Multi-purpose cleaner / sanitiser

A concentrated multi-purpose cleaner, degreaser and sanitiser. Diluted in potable water it provides economical and effective sanitising of work surfaces, floors, and most hard surfaces in the food industry.

MPI Approved C31

Availability

QUATROL

Quat Foam Cleaner.

A high foaming quaternary cleaner sanitiser designed for use with specialist foaming equipment. Foam clings to vertical surfaces to improve dwell time providing physical cleaning action to effectively remove protein soils and sanitise surfaces.

MPI Approved C41

Availability

FOOD AND BEVERAGE MANUFACTURING SUPPORT PRODUCTS

NEROLI NON-PERFUMED FLOWING SOAP

Anti-bacterial, foaming handsoap.

Neroli Non-Perfumed Flowing Handsoap is a high quality all-purpose liquid hand soap formulated for use from dispensers primarily in commercial hand cleaning applications. It has a neutral pH and a mild vegetable oil base formula that effectively cleans the hands leaving the skin clean and oil enriched. Neroli Non-Perfumed Flowing Handsoap contains a powerful bactericide, which affords antiseptic protection against a wide range of micro-organisms.

MPI Approved C51

Availability

SUPACLENE HEAVY DUTY CLEANER

Alkaline multi-purpose degreaser and cleaner.

Supaclene is a versatile spray, scrub and rinse cleaner ideal for all washable surfaces. Supaclene has a high alkaline formula incorporating emulsifiable solvents for rapid cleansing of walls, ceilings, floors, plastics and vinyl. Supaclene can also be used for effective cleaning of oil and grease from concrete floors in industrial buildings and process areas, and for cleaning engines and engine compartments.

MPI Approved C31

Availability

MEGAWASH VEHICLE AND BUILDING CLEANER

Multi-purpose hard surface cleaning chemical.

MEGAWASH Vehicle and Building Wash is designed for quick and economical vehicle cleaning through high pressure spray equipment. MEGAWASH Vehicle and Building Wash contains a blend of detergents that cut rapidly through road film and exerts a powerful emulsifying action. MEGAWASH Vehicle and Building Wash is biodegradable and does not contain caustic soda or hydrocarbon solvents.

MPI Approved C37
